GMRIT Training Tomorrow's Engineers Today

STEPCONE-2024

STANDARD OPERATING PROCEDURE

EVENT NAME: Arduino and IoT-Based Electrical Appliances

DEPARTMENT NAME: EEE

EVENT TYPE: WORKSHOP

REGISTRATION FEE: 200/-

EVENT COORDINATORS:

1. P. Deepthi
2. J. Chiranjeevi

EVENT DESCRIPTION:

Unlock the world of innovation and connectivity in the realm of electronics with our upcoming workshop on "Arduino and IoT-Based Electrical Appliances." This hands-on workshop is designed for enthusiasts, students, and professionals eager to delve into the exciting intersection of Arduino programming and Internet of Things (IoT) technology.

EVENT HIGHLIGHTS:

Arduino Fundamentals: Explore the basics of Arduino programming, covering key concepts, syntax, and functions. Gain proficiency in using Arduino boards, sensors, and actuators to build a strong foundation for your IoT journey.

Introduction to IoT: Delve into the fascinating world of the Internet of Things. Understand the principles behind IoT and how it enables seamless communication and control among interconnected devices.

Practical Application: Move beyond theory and get hands-on experience in developing IoT-based electrical appliances. Work on real-world projects that showcase the integration of Arduino with IoT technologies.

Smart Appliance Development: Learn how to transform ordinary appliances into smart devices. Discover the potential of Arduino and IoT in creating intelligent and responsive electrical systems.

Networking Opportunities: Engage with like-minded individuals, share ideas, and collaborate on projects. Networking sessions provide a platform for participants to connect with professionals and peers who share a passion for Arduino and IoT.

Expert Guidance: Benefit from the expertise of seasoned instructors who bring a wealth of knowledge in Arduino programming and IoT applications. Get valuable insights and tips to enhance your skills.

Challenges and Solutions: Explore potential challenges in implementing IoT solutions and discover effective strategies to overcome them. Learn from real-world scenarios and case studies.

PLAN OF ACTION:

It is dayshift event happens for three hours

Date: [To Be Announced]

Time: [To Be Announced],

Venue: [To Be Announced]

REGISTRATION:

Don't miss this opportunity to immerse yourself in the dynamic world of Arduino and IoT. Join us for a transformative workshop that promises to equip you with the skills needed to design and innovate in the era of smart electrical appliances.

Secure your spot now and be a part of the future of IoT!

Register online at [Registration Link] and grab the opportunity. Limited slots available, so sign up early to ensure your participation.

Report of the Event (Arduino and IoT Workshop)
17/02/2024

The Project and Innovation Club of the Department of Electrical and Electronics Engineering proudly organized the Arduino and IoT Workshop on February 17th, 2024, from 10:00 AM to 1:00 PM, attended by 40 students. This workshop provided participants with a comprehensive introduction to the dynamic intersection of Arduino technology and the Internet of Things (IoT). Throughout the workshop, students learned how to integrate Arduino microcontrollers with IoT concepts, enabling them to create smart and connected devices. The practical hands-on sessions covered essential topics such as sensor integration, data communication, and basic programming for IoT applications. The workshop aimed to empower students with the skills needed to innovate in the rapidly evolving field of IoT, fostering creativity and problem-solving. It offered a valuable opportunity for students to explore the exciting possibilities at the crossroads of hardware and connectivity, leaving them better equipped to contribute to the future of smart technology.
