Report of the Event (Arduino and IoT Workshop)
17/02/2024

The Project and Innovation Club of the Department of Electrical and Electronics Engineering proudly organized the Arduino and IoT Workshop on February 17th, 2024, from 10:00 AM to 1:00 PM, attended by 40 students. This workshop provided participants with a comprehensive introduction to the dynamic intersection of Arduino technology and the Internet of Things (IoT). Throughout the workshop, students learned how to integrate Arduino microcontrollers with IoT concepts, enabling them to create smart and connected devices. The practical hands-on sessions covered essential topics such as sensor integration, data communication, and basic programming for IoT applications. The workshop aimed to empower students with the skills needed to innovate in the rapidly evolving field of IoT, fostering creativity and problem-solving. It offered a valuable opportunity for students to explore the exciting possibilities at the crossroads of hardware and connectivity, leaving them better equipped to contribute to the future of smart technology.
